

## A Night At The Movies

You'd be hard put to come up with another item that's had as big an impact on our culture than movies. (Well, OK, music...computers...the internet...social media...) Anyway, movies are Americana, and part of our lives. They go back to our childhood, and, today, are not only available in theatres, but on TV, cell phones, tablets, DVDs, and digitally.

Movies entertain, educate, proselytize, form new attitudes, add to our language, and the list goes on. We all have our favorite films and favorite actors, as well as those we hate.

We don't really see new Movie covers anymore, at least here in the U.S. But, elsewhere, where smoking is still in full swing, such covers can still be seen.

There are some great Movie sets, but again, all the ones that come to mind are Foreign. This is a good nostalgic small category.
