
KNOW YOUR COVERS!

Lion 30 STICK was a Lion Match Co. manumark used c. 1945-c. 1958. These 30-strikes are characteristically heavy, thick covers with attractive designs. The manumark is usually on the front, but may sometimes be seen on the inside of the cover.

I have seen a few with Displays inside, but the Lion 21 FEATURE manumark was normally reserved for Lion's fancier 30-strike versions.

There are 4,960 covers are currently listed. Tom Valachovic, FL, I believe, reported having 7,448 in November 2010, so these were quite popular covers with customers.

These are very nice covers, especially considering their age, and more than a few collectors seek them out...I certainly do!
