

Military Errors

by
Mike Prero

Errors! Errors! Errors! Boy, there seems to be a lot of them! Actually, though, there aren't, not considered against the hundreds and hundreds of millions of matchcovers produced over the years. Still, you can certainly find them in every category, big and small. Pictured here are just a few of those to be found in the Military category. Most seen here are simple miscuts, and that's because miscuts are by far the most common type of errors to be found. Examples of off-center printing and over-printing can be seen on the next page. There are other types of errors that can be found, as well: end-of-roll, spelling, reversed text, missing striker, double striker, 40s cut as 20s, 20s cut as 40s, and more.

I do the listing on Errors. 2,054 currently listed, but I'm way behind. Scans of yours would be appreciated.
