

## The Allure

A picture is worth a thousand words! And that's certainly the major portion of the attraction of this category.

Black and White photos chronicle all sorts of things about our culture over the last 100 years—hair styles, clothing styles, architectural styles, machines, etc.

Drawings do the same, of course, but Black and White photos are much more... authentic!

## Of Black & White

I started collecting in this category a couple of years ago and currently have approximately 800, but, sometime in the future, I may slim my collecting parameters down to just the older B&W photos...they're the ones that really have the allure for me.

I find the old photos of appliances, hair styles, and fashions especially interesting. I suppose items such as those are ones I can more readily identify with and make comparisons with based on current trends.
