

## Chestnuts Car Set

Isn't *this* a nice set! It certainly catches your attention! Not only are the cars nice, in and of themselves, but these are color photos; they're full-lengths; and, as we discussed in our last issue, they're all full-frontal covers.

Chestnuts is/was a small restaurant chain in the Northeast. I don't believe we have any here in the West, and I'm not certain it even exists anymore.
