

## Vintage

Well, we've had Tires, Motor Oils, and Old Cars... Why not Gasolines?

Now, any Auto connoisseur will surely tell you that Gasoline covers, while perhaps not possessing quite the attraction of our previous three categories, still certainly have something to offer the collector.

They're colorful, for the most part, and most, if not all, have at least a certain brand name recognition (at least to us 'vintage' collectors).

Gasolines

Still, it's my theory that the attraction of these covers comes not from the brand name gasolines they represent, but rather the gas stations they remind us of.

I'll wager that almost all drivers identify more with the gas stations they use than the gasoline they're putting in their cars.

When I go into my regular ARCO station, I never once have thought about the actual gasoline, other than selecting 'regular'! Thanks to Loren More, CA, for these]
