

Girlies!

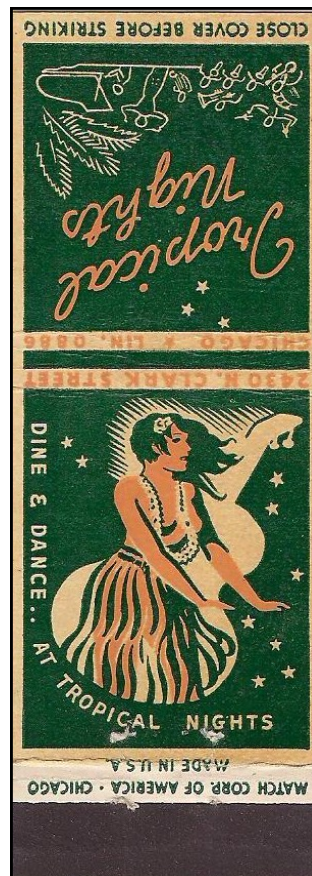

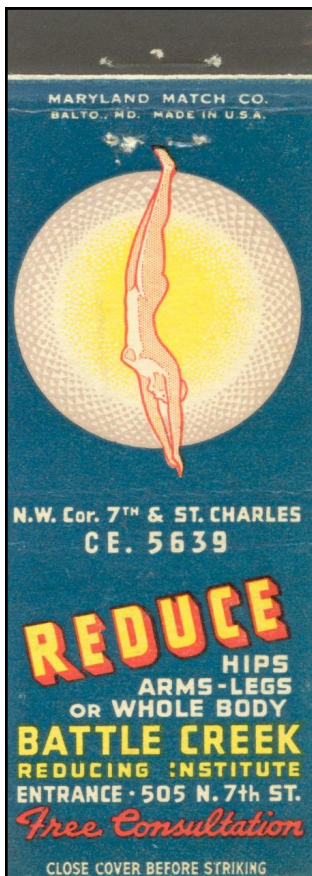

Ah, the blessed female form...the subject of...practically everything from the beginning of time!
[says something about us men, don't you think?]

Not surprising that Girlies are the most popularly collected category in the hobby, and has been for years.

Girlies are subdivided into several types. For example, there are the singles; there are stock cuts; then there are sets, which are in turn divided into domestic and foreign.

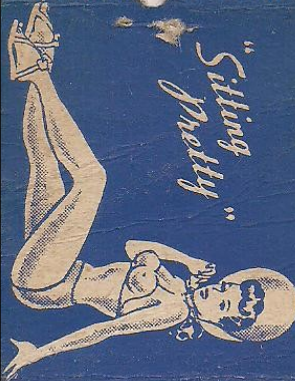

The Girlie Club puts out the listing. The singles alone are now pushing the 6000's. My singles catalog is in *two* 3" binders!

With the decline in new covers, almost all new Girlies are either put out by collectors or foreign sources. Older ones, though, are always coming to light, so should you actually reach 6,000...*you ain't finished!*
