

2017 Priva Set

Bear collectors should take note of these! Our foreign correspondent, Hans Everink, who resides in the Netherlands, picked these up in a supermarket in Germany. We're not sure if this is the entire set or not.

Size is 105 x 51 mm and they were produced in India.

The boxes contain 38 matches...kind of a weird number to settle on. I suppose the price determined how many matches to each box.

Europe and Asia are still cranking out the boxes by the bizillions!

Our thanks again to Hans, who keeps us posted on the match goings on in Europe.
