2007? Romanian Box Set

Here's another colorful box set from Europe. This seven box set, under the Three Lights label, was apparently manufactured in Indonesia (there's no indication of such on the boxes, but my source says so).

Again apparently, they are export issues, as they were sold in Romania, although it certainly may have been available in other European countries as well.

The boxes show several different outdoors scenes, but none have any text to indicate what they represent. We're guessing that the "0807" number on the bottom of each box means August 2007.

[Thanks as always to our ever-diligent agent Hans Everink, Netherlands, for these. Hans regularly keeps us posted of new issues popping up in Europe.]
